ADVICE FOR MAINTENANCE

EVERYDAY MAINTENANCE

Vacuum cleaner

useful for completely eliminating surface dust.

OCCASIONAL MAINTENANCE

Carpet-cleaner with injection extraction:

The most suitable cleaning system, ensures an excellent result on any kind of textile surface.

For this operation we advise consulting a specialist.

Complete removal of every stain cannot be guaranteed. Always ask an expert before treating any stains.

Correct maintenance will keep your carpet in good condition over time.

SUGGESTIONS FOR REMOVING STAINS

WATER: Absorb as much as possible with a clean cloth and let the stain dry up.

Treat any contingent mark with shampoo or denatured alcohol.

ALCOHOL, SPIRITS: Apply some shampoo and then dab with denatured alcohol.

BUTTER, OIL, SAUCES: Dab with ethyl alcohol and then apply shampoo. If the stain remains, dab with some diluted ammonia.

COFFEE, TEA: Apply some shampoo. If the stain remains, dab with denatured alcohol or diluted ammonia.

WAX, PARAFFIN: Apply a sheet of blotting paper and go over the surface with a tepid iron. Dab with ethyl alcohol and then shampoo.

GLUE, PAINTS: Apply ethyl alcohol and then dab with tepid water or shampoo.

PAINTS :

Oil — dab with ethyl alcohol and then shampoo.

Tempera — if the stain is fresh, dab with cold water.

If the stain is old, refer to a specialist.

COSMETICS, MEDICINALS: Apply ethyl alcohol then shampoo. If the stain remains use diluted ammonia or denatured alcohol.
